President interview

Q1. Please tell us about the business performance of the 39th term.

We changed the fiscal term this year to match the term of SCHOTT AG, our parent company, with the aim of improving efficiency. Thus, the 39th term was an irregular fiscal term of 6 months from April 1 to September 30, 2010. Due to this change, please note that the sales are smaller than the usual fiscal term.

Now, during this term, the consolidated sales were 6,592 million yen (54.2% increase from the same period last year), the operating profit was 279 million yen (operating loss of 899 million yen in the same period of last year), recurring profit was 287 million yen (recurring loss of 927 million yen in the same period of last year), the net profit was 17 million yen (net loss of 2,548 million yen in the same period of last year).

We received steady orders from our customers in our core business areas particularly in the semiconductor manufacturing and electronic component mounting industries, as if to augment the capital investment cut back of the previous year. Thus, the business performance improved helped by the rapid recovery of the market.

Furthermore, during the 39th term, the restructuring of our subsidiary in China was carried out to reduce production cost. At the same time, the production which was done in Yaita factory was transferred to Moritex Technologies Co. Ltd in Shenzhen, China.

I believe that the great recovery of our business during this term is due to the recovery of the market as well as the result of the various restructuring measures we have implemented since previous term. We would like to continuously strengthen our profitability and aim at resumption of dividend payments as soon as possible.

Note: For "the same period of last year", we have used the accumulated figures from the 2nd quarter of previous year

Q2. Please explain to us about the future business strategy.

In the short term, we would like to further strengthen our status in the market of the semiconductor manufacturing, electronic component mounting and LCD

President and CEO

Mr. Noboru Matsuoka

purchasing, as we are also manufacturing SCHOTT products, we are establishing a joint purchasing system with SCHOTT at MORITEX Technologies Co. Ltd (Shenzhen). We expect that this will contribute to the reduction of production cost. In research and development, we are also participating in the development activities in the Business Unit Lighting and Imaging of SCHOTT, which has development locations in Germany and the USA, and carrying out development activities tapping into the strength of each company and each location. Moritex is focusing on the development of lenses and LED related products using our core technologies. This is already showing some results.

Also, we are introducing a new system which renews our management system consolidates the management figures which are currently managed independently by each section.

With all the activities in sales, production, R&D, and management, we strive to globally increase our sales, reduce production cost, accelerate the development of new products, and enhance management efficiency which will enable us to become a stronger company.

Q3. Please provide a message to the shareholders.

We achieved a positive result for the first time in 3 fiscal terms by taking advantage of the turn around in the economy. We are aware that we had the shareholders worried during the last 3 terms. We acknowledge that we have not yet achieved the resumption of dividend payment and will work on this as an important challenge.

Although we were able to implement restructuring measures and the market was favorable during the 39th term, there is now some uncertainty in the market.

However, we believe that what we have implemented, in combination with the current efforts across the company, will enable us to establish a system that will increase profit even under unpredictable business environment.

With better profitability, we will aim at the resumption of dividend payments as soon as possible. We would appreciate your continuous support and encouragement.

39th Business Report

Financial Highlights

(Unit: Million yen (fractional figures are rounded down.))

	Consolidated		Non-consolidated	
	39th Term (Year ended September, 2010)	38th Term (Year ended March, 2010)	39th Term (Year ended September, 2010)	38th Term (Year ended March, 2010)
Net Sales	6,592	9,684	6,166	9,183
Operating profit	279	- 829	501	- 642
Recurring profit	287	- 745	495	- 625
Net Income	17	- 2,508	331	- 2,168
Net Income per Share	1.25	- 180.44	23.83	- 156.01
Total assets	8,292	8,412	8,335	8,292
Net assets	3,117	3,066	3,378	3,048
Net assets per share (yen)	223.72	220.45	242.49	219.17
Return on equity (%)	0.6	- 58.7	10.3	- 52.9

(NOTE) 1. The period of the 39th term is 6 months from Apr. 1, 2010 to Sep. 30, 2010, as the account settlement period has been revised.

(NOTE) 2. Net income per share and return on equity for this term are for the 6 months.

Sales by Segment (Consolidated)

(Unit: Million yen (fractional figures are rounded down.))

	MVS & Industrial	Cosmetic Instruments	Optocom	Functional Materials	Bio-related	Overseas	Others
39th Term (Year ended September, 2010)	4,395	351	271	742	—	656	176
38th Term (Year ended March, 2010)	5,690	950	493	1,223	497	829	0

(NOTE) 1. The period of the 39th term is 6 months from Apr. 1, 2010 to Sep. 30, 2010, as the account settlement period has been revised.

(NOTE) 2. "Bio-related business" is not included in the businesses operated by our corporate group, because of the business transfer in the 38th term.

(NOTE) 3. The segments of our corporate group have been changed from the 39th term, as the Cabinet Office Ordinance stipulates the adoption of the management approach for disclosing segment information.

* The period of the 39th term is 6 months from Apr. 1, 2010 to Sep. 30, 2010, as the account settlement period has been revised.

Performance Overview

MVS & Industrial Business

The MVS & industrial segment sells components of or a combined module of lenses, light sources, optical fiber light guides, and LED lighting for FA imaging and image processing systems targeting the semiconductor manufacturing and LCD manufacturing industries. The department also manufactures and sells CCD microscopes for industrial use by the inspection department of electronics manufacturers.

The semiconductor manufacturing, electronic component mounting, and LCD manufacturing industries, which are this division's main sales destinations, showed good results due to rapid increase in the demand for semiconductors as the global economy recovered. Particularly in the semiconductor manufacturing and electronic component mounting industries, the amount of orders received was constantly high as the capital investment in the semiconductor industry resumed.

Under this condition, the orders to our company group were constantly high, and the sales and operating profit had dramatically improved as compared to the same period of last year.

As a result, the sales of this department came to 4,395 million yen, up 117.5% from the same period of last year.

Cosmetic Instruments Business

The cosmetic instruments segment manufactures and produces skin counseling system for the cosmetic industry.

The sales has reduced to our customers in the cosmetic industry because 1) the demand for cosmetic companies to replace counseling systems had reduced compared to the same term last year, and 2) the delivery of the products was concentrated from the latter half of the previous fiscal year to the first quarter of the 39th period.

However, the operating loss decreased compared to the previous term as a result of cost reduction efforts by improving business structure.

As a result, the sale of this department came to 351 million yen, down 26.0% from the same period last year.

Optocom Business

The Optocom segment sells optical parts/optical modules to the optical communication companies. Although the demand for the optical parts for FTTH (Fiber to The Home) is high, the sales turned out to be the same level as last period due to the increasing price competition of optical parts.

Regarding profit, the operating loss was reduced compared to the previous term as a result of the business restructuring.

As a result, the sales of this department came to 271 million yen, up 2.9% from the same period of last year.

Performance Overview

Functional Materials Business

In the functional materials segment, the sales and operating profit dramatically improved compared to the same period last year due to 1) favorable sales of tubes for medical use and particles and 2) recovery trend of orders in line with the economic recovery.

As a result, the sales of this department came to 742 million yen, up 31.9% from the same period of last year.

Overseas Business

The sales of the overseas business had dramatically improved compared to the same term last year due to the recovery trend of orders from affiliated companies in line with the global economic recovery.

Regarding profit, the operating loss increased compared to the same period last year due to production relocation to MORITEX Technologies Co., Ltd (Shenzhen).

As a result, the sales of this business came to 656 million yen, up 36.2% from the same period of last year.

Other Business

As other business, we primarily sell products of the SCHOTT Group. The business was transferred from SCHOTT Nippon to us in the previous term. Therefore, we are making efforts to expand sales to Moritex customers in addition to the existing customers, as well as expanding to new business fields. We booked an operating loss for the 39th fiscal term due to a proactive increase in sales people.

As a result, the sales of this business came to 176 million yen (0 yen in the same period of last year).

(Note) 1. From the current consolidated fiscal year, we changed the segment structure of our group company in response to the revised order of the Cabinet Office for new management approach to disclose segment information.

(Note) 2. From the current consolidated fiscal year, we changed the accounting settlement term from March to September. Thus, this report compares this term with the accumulated results of the second quarter of the previous year (same period as last year).

Financial Statements (Consolidated)

Consolidated Balance Sheet (Summary) (Unit: thousand yen)

Moritex announces the launch of new constant voltage controlled LED illumination, “MCV-Light Series”

—New global product of LED illumination for the image processing field—

Moritex Corporation has announced “MCV-Light Series” as the latest addition to its core product lineup of LED illuminations for the machine vision and industrial business.

Moritex has been enjoying an excellent reputation of its unique constant current controlled “MG-Wave series” as a high-performance and very reliable illumination product that enables both low heat emission and high luminance efficiency at the same time. Meanwhile, Moritex Singapore Pte Ltd, an affiliate of Moritex, has also been supplying highly versatile constant voltage controlled LED illumination products to some overseas customers under the brand name “Prelude”. To respond to the recent ever-diversifying customer needs, Moritex has decided to make an extensive modification on “Prelude” and put it on the world market as its strategic global product with the new CV-Light brand name. Moritex and its parent company, Schott AG, will roll out a joint marketing worldwide with these new LED illumination products.

According to a research by Moritex, the company has become the only manufacturer in the world who carries a complete LED product lineup with both constant current control and constant voltage control systems. Now users can select their desired lighting solutions from “MG-Wave Series” and “MCV-Light Series”. By combining these enhanced LED illumination series with various lens products offered by Moritex, users can be provided with their optimal setup for image processing.

As a leading company in machine vision systems incorporating lenses, illumination products and cameras, Moritex continues to offer “one-stop total solutions” to the market with various users who are seeking for their desired image processing environment.

Moritex and NEC SCHOTT Components Establish Strategic Cooperation to Widen Product Offering for Customers of Optical Telecommunication Components

Moritex and NEC SCHOTT Components Corporation agreed to strengthen their sales activities in the field of optical components for optical telecommunication and visit each other’s customers together.

Moritex provides a wide variety of customized products such as production systems, modules and components for the optical telecommunication industry. Specifically, Moritex boasts over 30 years of experience in selling ball lenses which are used to connect the light-emitting/light receiving devices with the optical fibers. With these ball lenses and aspherical lenses which are used for coupling lenses of access optical telecommunication light sources, Moritex provides products to optical telecommunication related equipment manufacturers.

NEC SCHOTT Components Corporation is a joint venture company of NEC, the leading company of electronics, and SCHOTT, a manufacturer of special glasses in Germany. It was established in September 2009. Its core technologies are glass-to-metal and ceramic-to-metal sealing, thermal sensing components as well as a variety of cutting-edge specialty glass competences. In the telecommunication field, NEC SCHOTT Components manufactures and sells various modules that connect micro lenses with metal cap (chassis) by using the technology of welding metal and glass.

Moritex and NEC SCHOTT Components both belong to the global technology group, SCHOTT AG. Both companies expect to leverage upon each others’ strength and collaborate to offer a wider product portfolio and closer support to customers.

About SCHOTT Group

Moritex is a member of the SCHOTT group. The headquarters is with the SCHOTT AG, located in Mainz, Germany.

SCHOTT is a multinational, technology-based group with the core purpose of reaching a sustainable improvement in how people live and work through developing, manufacturing and supplying special glass, specialty materials, components and systems. The main markets of SCHOTT are home appliances, optics, electronics, pharmaceutical packaging, automotive and solar energy. With SCHOTT's outstanding technical know-how, SCHOTT constantly contributes to the success of customers.

SCHOTT group data (Year ended September, 2009)

Sales:	2,261 mio Euro
EBIT:	-22 mio Euro
Investments:	216 mio Euro
Manufacturing companies and sales companies:	Business in more than 40 countries
Employees:	Over 17,000 in the world

Concentrated Solar Power With development and production of receivers, SCHOTT advanced as one of the world's leading suppliers of Concentrated Solar Power plant components.

Glass fiber production of SCHOTT

SCHOTT Headquarters in Mainz, Germany

SCHOTT produces syringes, cartridges, vials and ampoules, made of glass and polymer, for the pharmaceutical industry worldwide.

SCHOTT CERAN® glass-ceramic cooktop panels CERAN® glass-ceramic panels for cooktops are one of SCHOTT's great success stories. In 2010 SCHOTT CERAN® won the German Innovation Award in the Large Enterprises category.
